<thinking>

※ ユーザが ACT MODE へ遷移し 1 + 2 の結果を求めている。Add calculator の add 関数が目的に合致する。

The user has switched to ACT MODE and wants to calculate 1 + 2. The "Add calculator" MCP server provides an "add" tool for this purpose. The required parameters are:

- a: integer (1)
- b: integer (2)

All required information is present. I will use the MCP tool to perform the calculation.

</thinking>

<use_mcp_tool>

<server_name>Add calculator</server_name>

<tool_name>add</tool_name>

<arguments>

{

 "a": 1,
 "b": 2

}

</arguments>

<task_progress>

- [x] Use MCP server "Add calculator" to calculate 1 + 2
- [] Present the result

</task_progress>

</use_mcp_tool>
